Education

Pune Institute of Computer Technology (PICT), Pune

Bachelor of Engineering in Computer Science

2023 – Present

Current CGPA: 9.565/10

Bhavans B.P. Vidya Mandir, Nagpur

Class XII (CBSE)

2021 – 2022

Percentage: 79%

Sri Guru Harikishan Public School, Nagpur

Class X (CBSE)

2019 – 2020

Percentage: 93.20%

Experience

Research Intern

Pune Institute of Computer Technology (PICT)

Jan 2026 – Apr 2026

Pune, India

- Built a 3-tier microservice platform featuring a React 19/Vite frontend, Node.js/Express API Gateway, and a Python Flask ML engine for real-time resume analysis and job matching.
- Engineered an NLP pipeline using scikit-learn TF-IDF vectorization, pre-trained classification models, and NLTK, achieving blended ATS match scoring via cosine similarity and keyword overlap.
- Developed an automated PDF parser using pdfminer3, PyPDF2, and custom RegEx heuristics to extract candidate metadata, evaluate structural ATS completeness, and generate domain skill gap reports across 5 tech fields.
- Built a responsive React dashboard supporting drag-and-drop PDF uploads, role category predictions, interactive structural audit scores, and curated upskilling recommendations.
- **Tech Stack:** Node.js, Express.js, Python, Flask, scikit-learn, TF-IDF, NLTK, PyPDF2, React.js, Vite, Tailwind CSS.

Projects

PetConnect – Full-Stack MERN Platform

- Built a multi-role pet platform for Users, Caretakers, and Admins with JWT/Google OAuth, RBAC, and OTP-based password recovery.
- Engineered pet marketplace, caretaker bookings, admin moderation, and Cloudinary image management, with Razorpay payments for transactions and premium subscriptions.
- Developed real-time chat and notifications using Socket.io and integrated Google Gemini AI with custom rate limiting for usage quotas.
- Automated scheduled emails and background tasks using Nodemailer and Cron jobs.
- **Tech Stack:** React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.io, Razorpay, Gemini AI, Cloudinary, Nodemailer, Cron Jobs.

Doctor Appointment Booking System

- Developed a full-stack doctor appointment booking system using React.js, Node.js, Express.js, and MongoDB.
- Implemented user authentication and appointment scheduling functionality.
- Designed features for booking, managing, and canceling appointments with doctors.
- Built a responsive user interface for seamless user experience across devices.

LinguaLink – Node.js, Express.js, React.js, MongoDB, Stream

- Built a fully functional Language Exchange Platform featuring Real-Time Text and Video communication.
- Implemented 1-on-1 and group video calls with screen sharing, recording, typing indicators, emoji reactions, and chat using Stream SDK. (Learnt SFU vs MCU scaling)
- Enabled secure JWT Authentication and offered 32+ unique UI themes to enhance personalization.
- Evaluated alternatives (raw WebRTC + Socket.IO, Twilio/Agora) and chose Stream SDK to leverage built-in signaling, TURN/STUN servers, and scalability.

Technical Skills

Languages: C++, Java, JavaScript, SQL

Frontend: React.js, Redux Toolkit, Vite

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io, WebRTC

Database: MongoDB, Mongoose

Core Subjects: Data Structures & Algorithms, Core Java, OOP, DBMS, OS, CNS

Problem Solving

Solved 300+ Data Structures and Algorithms problems across coding platforms.

Extracurricular Activities

- PICT IEEE Student Branch Member.
- Volunteered for Credenz Group Day.
